

# PREDICTING SCHOOL CLOSURE

CAN WE IDENTIFY  
SCHOOLS AT RISK FOR  
CLOSURE BY  
PERFORMANCE AND  
OTHER CHARACTERISTICS?

# LABEL: SCHOOL WILL CLOSE WITHIN 5 YEARS

## FEATURES:

### School Characteristics

- ☐ Geographic Region
- ☐ Elementary, Middle, or High
- ☐ Urban, Suburban, or Rural
- ☐ Magnet School (yes/ no)
- ☐ Charter School (yes/ no)
- ☐ Shared Time School  
(yes/ no)

### Student Demographics

- ☐ Total Enrollment
- ☐ Percent Minority
- ☐ Percent Free/  
Reduced Price Lunch
- ☐ Students Eligible for  
Title I Funding  
(all, some, or none)

### School Performance

- ☐ Student-Teacher Ratio
- ☐ Math Percentile Rank
- ☐ ELA Percentile Rank

# CLASSIFIER EVALUATION

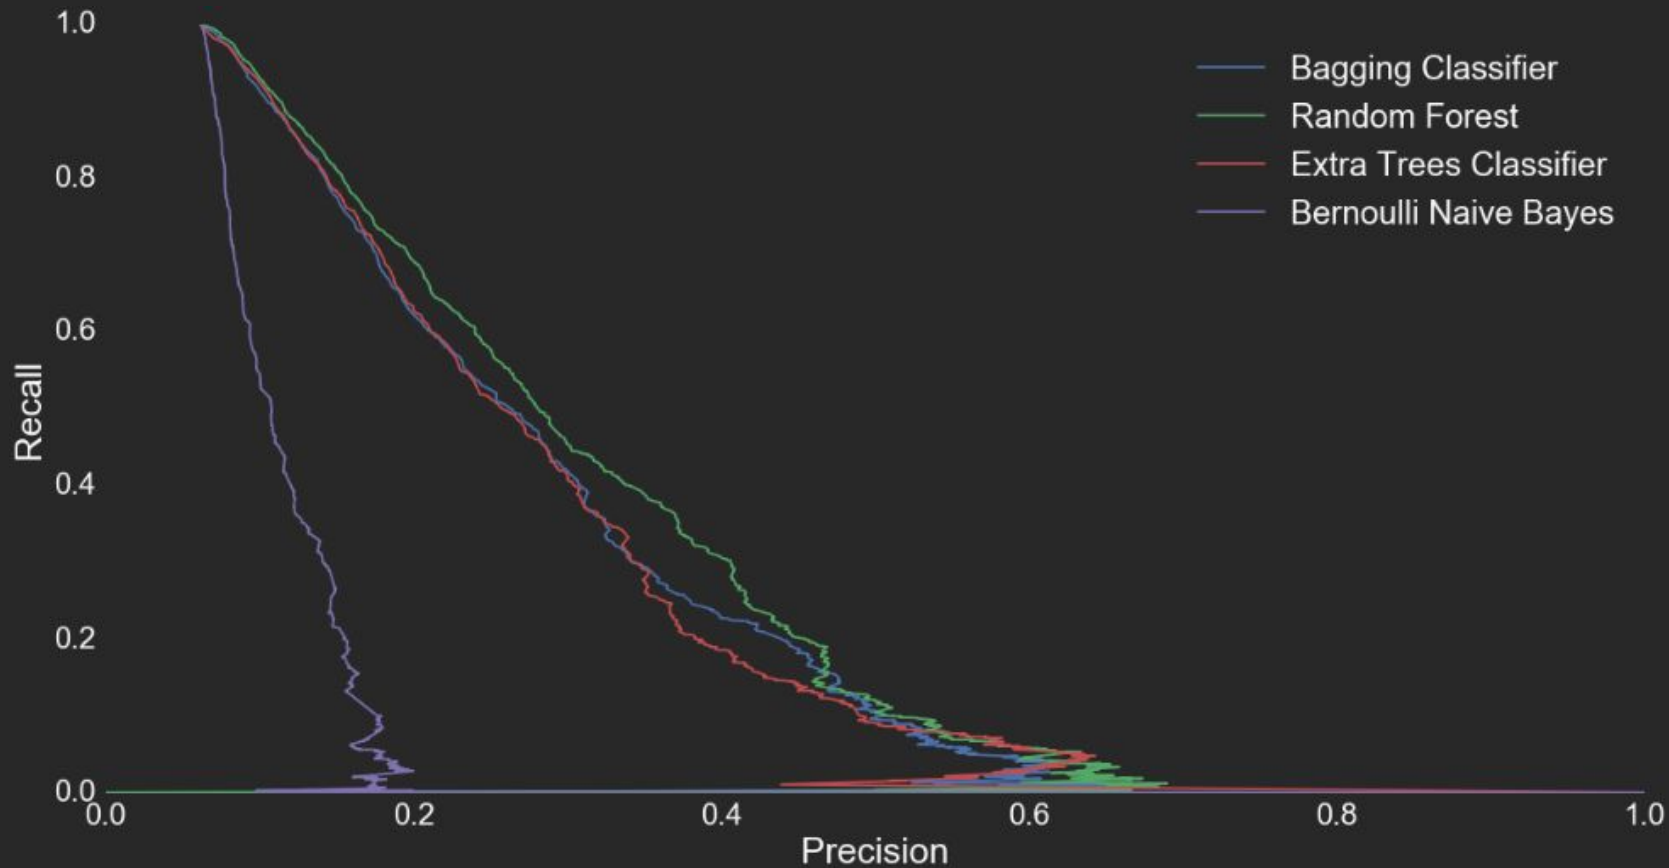

## RECALL

- Proportion of “At Risk” Schools Identified.
- Higher Recall =  
More Effective Policy

## PRECISION

- Proportion of Identified Schools Actually at High Risk for Closure
- Higher Precision =  
More Cost-Efficient Policy

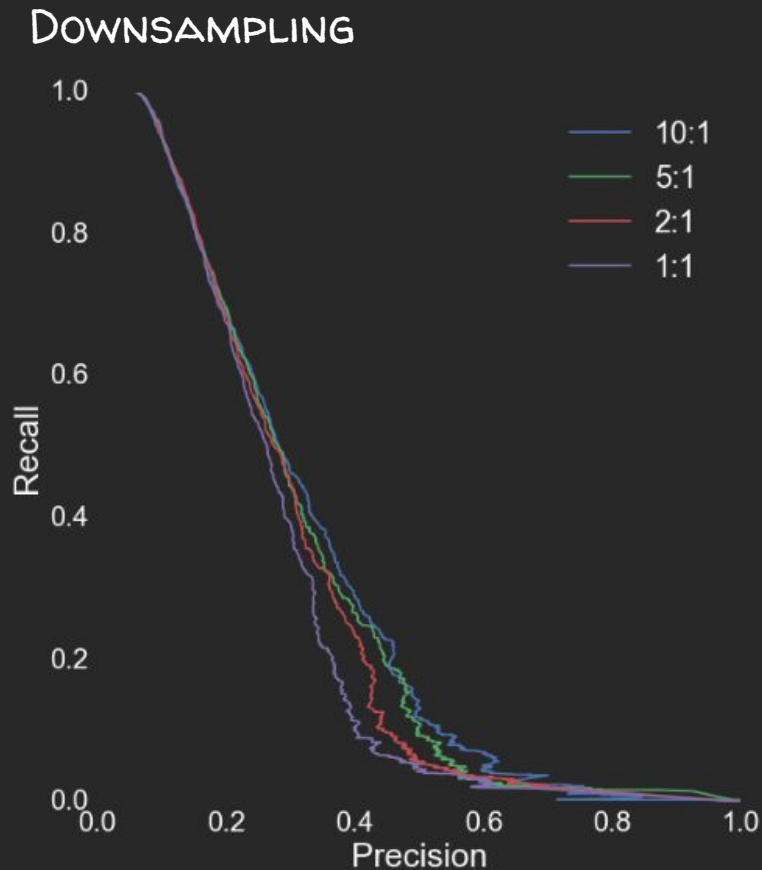

# CLASSIFIER PRECISION-RECALL CURVES (ON TEST SET)

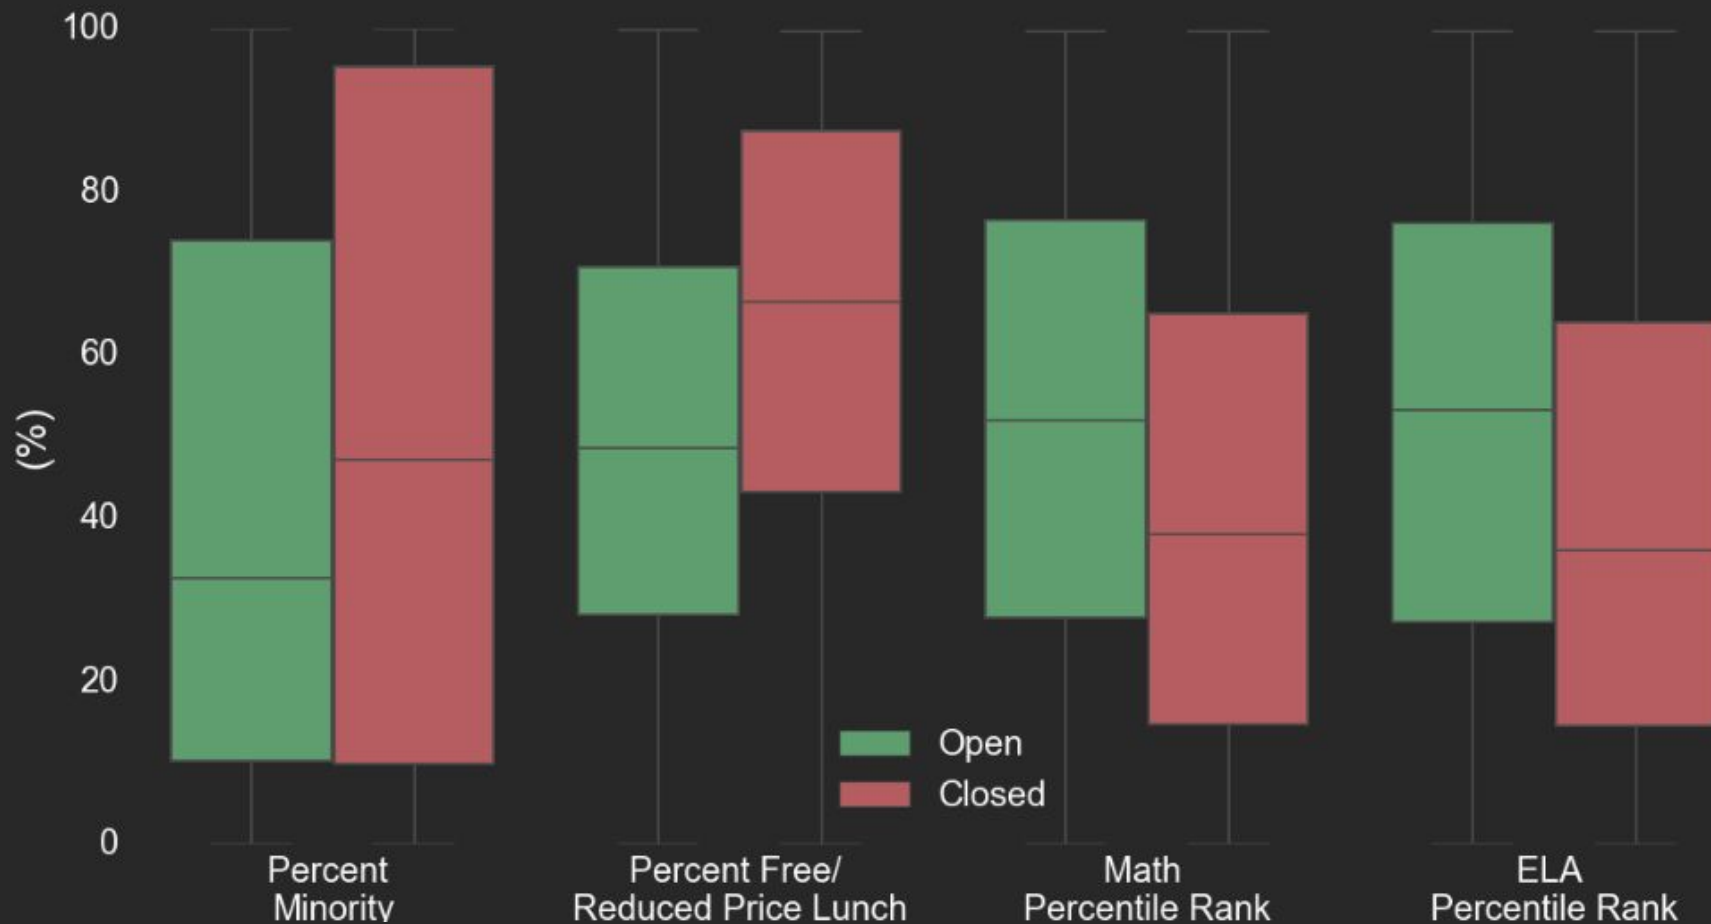

## (2): 1:1 DOWNSAMPLING

### (3): RANDOM FOREST WITH VARIABLE DOWNSAMPLING & UPSAMPLING

# CHARACTERISTICS OF OPEN VS. CLOSED SCHOOLS

# SCHOOL CLOSURES 2010-15

(PROPORTION OF CLOSED SCHOOLS BY COUNTY)

# INSIGHTS

1. School characteristics alone insufficient to predict risk of closure.
2. Poor model performance cannot be explained purely by class imbalance.
